ABOUT ME

I am a creative web developer who can design and develop engaging user experiences and visually striking user interfaces for your esteemed company. With years of experience in web development and as a university student majoring in computer science, I have the ability to turn your ideas into interactive and responsive web interfaces. I excel at working within a team and possess strong communication skills. While I work as a full-stack developer, my primary focus is on frontend development, specializing in React. On the backend, I work with Node.js and am proficient in several frameworks like Firebase and Strapi. I use the latest technologies and tools to deliver effective and innovative technical solutions. If you're looking for a web developer who combines expertise and creativity, I am here to help develop your website. You can browse my portfolio to learn more about me and my diverse experience.

EXPERIENCE

Freelancer :

Web developers

I work as a freelance web developer. I am a full-stack web developer, but I specialize more in the front-end with React, while for the back-end I use Node.js. I prefer platforms like Fiverr, Upwork, and Freelancer

University scientific clubs:

Club

In university clubs, we learn to work as a team and create various projects. We also attend and participate in major events, gaining experiences that benefit us in our professional careers
